## BLUE-i Gloss 6600

### Fast Drying Alkyd High Gloss Enamel

BLUE-i Gloss 6600 is a high quality fast drying solvent-based alkyd high gloss enamel for exterior & interior application on metal & wood surfaces. It is antifungal and water resistant, good hiding & easy-to-apply, having excellent gloss retention, making it ideal to be used in repainting works or housing projects where budget & fast completion of works are of major concern.

**Excellent Gloss Retention**  
For longer-lasting gloss that keeps your home looking fresh & vibrant

**Good Hiding & Easy-To-Apply**  
Provide effortless application with smooth finish

**Fast Drying**  
Saves time, energy & manpower

## BLUE-i Shield HS

### Weather Resistant Exterior Wall Finish

BLUE-i Shield HS is a water-based high sheen acrylic exterior paint formulated with superior light fastness pigments to give excellent outdoor durability against tropical climate. It has excellent resistance to algae growth and withstands alkali on plastered wall. It has good water resistance and suitable for long term decoration and protection of exterior plastered wall, concrete, brick, gypsum board etc.

## BLUE-i Gold

### Premium Quality Interior Wall Finish

BLUE-i GOLD is a premium quality water-based modified acrylic paint that provides a durable & attractive smooth matt finish to enrich the elegant ambiance of your home. It is a specially designed green product that has less of an environmental impact & less detrimental to human health. It is antifungal & multicolor tint-able, having good hiding & easy-to-apply, making it suitable for decoration of interior plastered wall, concrete, brick, gypsum board & etc. Ideal to be used in repainting works or housing project where budget is of major concern.

## BLUE-i Sealer 550

### Water-Based Alkaline Resistance Sealer

BLUE-i Sealer 550 is a water-based alkaline resistance styrene acrylic sealer for exterior & interior application on plastered wall, concrete, brick, gypsum board & etc. It serves as a protective barrier for the finishing topcoat against alkaline effects & moisture from the substrate. It is a specially designed green product that has less of an environmental impact & less detrimental to human health. It is water resistant, fast drying, good hiding & easy-to-apply, having excellent adhesion property, making it ideal to be used in repainting works or fast-track projects where fast completion of works is of major concern.

## BLUE-i BC Sealer 300

### Water-Based Interior Basecoat Sealer

BLUE-i BC Sealer 300 is a water-based alkaline resistance basecoat sealer for interior application on plastered wall, concrete, brick, gypsum board & etc. It provides adequate protection against mild alkali that causes discoloration on wall surface. It is a specially designed green product that has less of an environmental impact & less detrimental to human health. It is water resistant, fast drying, good hiding & easy-to-apply, having good adhesion property, making it ideal to be used in repainting works or housing projects where budget & fast completion of works are of major concern.

## BLUE-i Emulsion

### High Quality Interior Emulsion Paint

BLUE-i Emulsion is a high quality water-based interior emulsion paint that provides a durable & attractive smooth matt finish to enrich the elegant ambiance of your home. It is a specially designed green product that has less of an environmental impact & less detrimental to human health. It is antifungal, fast drying, good hiding & easy-to-apply, suitable for interior application on plastered wall, concrete, brick, gypsum board, ceiling etc. Ideal to be used in housing project where budget & fast completion of works are of major concern.

## BLUE-i Trade

### Project Interior Emulsion Paint

BLUE-i Trade is a water-based interior emulsion paint specially formulated for economical needs that provides a smooth matt finish to enrich the ambiance of your home. It is a green product that has less of an environmental impact & less detrimental to human health. It is antifungal, fast drying, good hiding & easy-to-apply, suitable for interior application on plastered wall, concrete, brick, gypsum board, ceiling etc. Ideal to be used in housing project where budget & fast completion of works are of major concern.

## BLUE-i Versa-Tile

### Inorganic Polymer Textured Coat

BLUE-i Versa-Tile is a water-based inorganic polymer textured coat. It serves as an intermediate coat that can be formed in various textured patterns to suit design requirement. It is a specially designed green product that has less of an environmental impact & less detrimental to human health. It is highly durable, alkaline resistance, having excellent adhesion property, suitable for exterior & interior application on plastered wall, concrete, brick, asbestos board, fiber board & etc.

## BLUE-i Undercoat

### Fast Drying Alkyd Undercoat

BLUE-i Undercoat is a high quality fast drying solvent-based alkyd undercoat for exterior & interior application on metal & wood surfaces. It serves as an intermediate coat that provides a sound foundation with adhesive strength for subsequent topcoat. It is water resistant, good hiding & build, having excellent adhesion property, making it ideal to be used in repainting works or housing projects where fast completion of works is of major concern.
